NEWSROOM TOPIC:

Autonomous fisheries survey vessel saves money and emissions

The aim of this project is to create an autonomous survey vessel that significantly reduces the need for large survey vessels.

Project locations
Estonia

Recruiting young people to train with experienced fishers

The Lapland fisheries LAG has financed a fisheries recruitment and training project to rejuvenate the ageing fisheries sector in the area around the Lokka and Porttipahka reservoirs. As a result, 14 young people of both genders have started to fish.

Project locations
Finland

Increasing seaweed production capacity

This fisheries LAG project helped a family-run company that produces, harvests, and encourages consumption of a sea vegetable known as sugar kelp to insulate the farm shop and build a new drying facility to increase production capacity.

Project locations
Denmark
